

101/670 (Core)

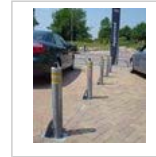

Manual and Fixed

[Manual and Fixed Bollards List](#)

Automatic

High Security and Anti-Terrorist

Optional Extras

The ATG 101 is the first round product of our family, the galvanised versions, from our core range, offer a great looking product in a more industrial finish.

The attractive looks lend this bollard to applications such as garage forecourt protection whilst choosing the galvanised option helps reduce cost.

Wall thickness: 0.20"

Optional Extras

- Lift Assist
- Sold Secure Lock
- Security Caps
- Drainage Pumps

Basic Installation Information

Diameter of hole: 16" Square
 Depth of hole: 41"

Insurance companies recommend 4.25 feet spacings between bollard centres, ATG Access works to this recommendation unless otherwise stated.
