

## 114/670 (Core)

Manual and Fixed

[Manual and Fixed Bollards List](#)

Automatic

High Security and Anti-Terrorist

Optional Extras

The ATG 114 bollard is literally the big brother of the ATG 101, with an increased diameter offering a more imposing deterrent to unauthorised vehicle attack or usage. The core version, with a galvanised finish is a great value bollard.

The 114 bollards can also incorporate our unique lift assist mechanism which can decrease the lifting weight of a bollard by up to 80%.

**Wall thickness:** 0.20"

**Optional Extras**

- Lift Assist
- Folding Handle
- Sold Secure Lock
- Security Caps
- Drainage Pumps

**Basic Installation Information**

Diameter of hole: 16" Square  
 Depth of hole: 41"

Insurance companies recommend 4.25 feet spacings between bollard centres, ATG Access works to this recommendation unless otherwise stated.
