

United States Department of State

Washington, D.C. 20520

ATG Access Inc
402 McKinney Parkway
Lillington, NC 27546

MAY 22 2009

Attention: Mr. Claybrook

Re: Letter, subj: ATG Access Inc. Acquisition of the Boon Edam Vehicle Barrier Product line, dtd April 21, 2009

Based on your acquisition of the Boon Edam Vehicle Barrier Product Line and your request in the referenced letter to include these barriers under ATG Access, the Physical Security Division, Bureau of Diplomatic Security, U.S. Department of State will add the specified barriers to the other ATG Access products. These barriers are:

Patriot Hydraulic Rising Beam, K12
Sentinel Shallow Foundation Hydraulic Wedge, K12
Magnum Hydraulic Wedge, K12
Stinger Shallow Foundation Hydraulic Wedge, K12
Mini-Magnum Narrow Blade Hydraulic Wedge, K12
Titan Hydraulic Retractable Bollard, K12
Defender Hydraulic Retractable Bollard, K4

The transfer of these barrier products to your name is with the understanding that the barriers will be manufactured in Lillington, North Carolina at the ATG Access operations and that these designs WILL NOT be changed from that previously tested and certified by the U.S. Department of State.

Your products must still compete with other manufacturers. The Department of State cannot guarantee your product will be chosen by architects or planners in the design of our facilities. We thank you for your continued interest and endeavors toward the protection of our personnel and facilities overseas.

Sincerely yours,

Charles D. Brandeis
Division Chief
Physical Security Division
Bureau of Diplomatic Security
