

Manual & Fixed Bollards

Perimeter protection, Ram-raid deterrent, Forecourt security, Roller shutter protection

Perimeter Protection

Ram-raid deterrent

Forecourt Security

Roller Shutter Protection

Our manual and fixed product family consists of our manually operated retractable security posts, our lift out perimeter hoops, our specialist pedestrian posts & retractacast bollards and the fixed or static equivalent of each of those products.

Each of our products is available in various finishes. We have separated them into different ranges to hopefully highlight which product is right for your project dependent on budget or aesthetics.

Core Range
Designed to keep costs to a minimum these products are designed to do the job required, probably more suited to industrial locations where aesthetics are a low priority

Mid Range
The mid range takes a step up in terms of aesthetic finishes but still offers great value for money.

With the same strength and security as the core range, mid range products are coated black.

Premier Range
The premier range again takes a step up in terms of aesthetics with products available in stainless steel or even in RAL colours to match corporate identity.

Ultimate Range
The ultimate range contains everything that is extra special & extraordinary from our product family.

This includes the ATG 139, the only impact tested retractable security post and our semi-automatic GloBoll bollard.

Optional Extras
are available across the range and include:

- Lift assist
- Semi-auto
- Security caps
- Folding handles
- Lift out posts
- Drain pumps

Core range posts are galvanised

Mid range bollards are coated black

Stainless Steel or RAL colour options
